

Liana Gizatulina

Platform Engineer · AWS · Kubernetes · Terraform · Agentic AI

Tampa, FL · 727-215-8990 · liana.gizatulina@gmail.com · linkedin.com/in/liana-gizatulina · lianagizatulina.com

SUMMARY

Platform engineer with 5+ years building and operating AWS and Kubernetes infrastructure for product teams. Actively building reusable agent skills for production — most recently for incident investigation. Designing the guardrails that let AI do real infrastructure work safely and consistently.

EXPERIENCE

Platform Engineer | Affirm | Remote · Jul 2023 — Present

- Built an AI incident-response layer for 50 services with Claude and MCP, cutting first-pass triage from 22 to 8 minutes while the agent stayed read-only and proposed every fix as a pull request.
- Deployed a full open-source observability stack with Prometheus/Grafana/Alertmanager, replacing \$300k/year Datadog monitoring SaaS, while maintaining 99.9% availability SLO, end-to-end with dashboards and burn-rate alerts in production.
- Rolled out AI code review across 30 repos with a customized Claude Code GitHub Action, checking each change against its Jira ticket and surfacing requirement mismatches and security issues before human review.
- Secured credentials for 40+ microservices to meet compliance requirements by migrating to Secrets Manager CSI on Kubernetes workloads.
- Automated environment provisioning across 15 AWS accounts with reusable Terraform modules for networking, IAM and Karpenter, taking a two-day manual runbook down to a one-hour self-service path.

DevOps Engineer | Clearcover (digital auto insurance) | Chicago, IL · Apr 2021 — Jun 2023

- Led EKS version upgrades across development, staging, and production, coordinating add-on and workload compatibility with no customer-facing downtime.
- Moved CI and EKS authentication off long-lived AWS keys — pipelines for 4 application teams onto GitHub Actions OIDC, 35 workloads onto service-scoped IRSA roles.
- Packaged services with Helm charts and multi-stage Docker builds, replacing hand-applied manifests with a pipeline-driven deploy path.

SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, IAM, S3, RDS, Lambda, EKS), Linux, Docker, Kubernetes, Karpenter

IaC & Delivery: Terraform, Helm, Argo CD, GitOps, GitHub Actions, CI/CD, Git

Observability & Reliability: Prometheus, Grafana, Alertmanager, CloudWatch, Datadog, SLOs/SLIs, error budgets, incident response

Security & Identity: IAM, OIDC, IRSA, Kubernetes RBAC, AWS Secrets Manager, Secrets Store CSI Driver

AI Engineering: Claude API, Claude Code, Model Context Protocol (MCP), agentic workflow design, AI-assisted incident response, AI code review

Languages & Scripting: Python, Bash

CERTIFICATIONS

- Certified Kubernetes Application Developer (CKAD) — CNCF / Linux Foundation, 2026
